## **WHAT MAKES OUR SIGNS SUPERIOR TO THE REST**

We make sure that customer satisfaction is at the front of our priorities, and you can be sure that purchasing signs from GSB Signs we have your interests as our top priority.

This year we have made two fundamental changes to the signs we manufacture that make GSB Signs different from the rest.

This was from feedback we had received from our customers.

It became apparent to us that industry standard 1mm plastic signs were not strong enough and broke very easily. We decided that all our outdoor signs from now on would be made from 5mm plastic thus being much stronger. Also interior signs made from 1mm plastic warp with the heat so we produce all interior signs from 3mm plastic to overcome this problem. We also decided that it was unfair to have to pay extra for thicker signs so these signs are supplied today for the same price as we used to charge for thinner industry standard 1mm plastic signs.

Secondly signs that face sunlight for long periods tend to fade with time (usually between 1 to 2 years) we decided that all our external signs were to be made with a clear protective film overlay to protect against fading from UV and also rainwater.

Therefore all our signs now come with a **lifetime guarantee** against fading.

- All outdoor signs produced from 5mm plastic
- All outdoor signs are protected with a clear laminate overlay for protection from uv and rain
- All interior signs produced from 3mm plastic
- All signs come with a **lifetime guarantee**
- Company logos printed on any sign at no extra cost

### What this means for you the customer:

- You will no longer need to worry about having to replace thin broken signs.
- You will no longer need to replace signs that have faded.

- You have peace of mind that your signs are guaranteed for life.
- You can have your own company branding on any sign you specify.
- You are not paying a penny extra for all these benefits.

We hope you enjoy browsing our new web site and look forward to supplying you with any safety signs you may require in the future.

If you cannot find the product that you are looking for or require a specific item you can simply call or email us.

All the details that you need to contact us can be found on the contact us page.

Thank you for taking the time to visit [our website](#) and we look forward to hearing from you soon.
